Core Readiness Verification Checklist

- ☒ **Java / JVM Mechanics:** Garbage collection, ThreadLocal memory leaks, HashMap internals, String Masterclass & Immutability.
- ☒ **Playwright & TypeScript:** BrowserContext, auto-waiting, custom fixtures, storageState authentication.
- ☒ **API & REST Assured:** Jackson serialization, JSON Schema validation, dynamic payloads.
- ☒ **Framework & Systems Architecture:** ThreadLocal isolation, dynamic data factories, config management.
- ☒ **CI/CD & DevOps:** GitHub Actions matrix sharding, blob report merging, deployment canary strategy.
- ☒ **SQL Mastery:** Query execution order, window functions (`DENSE_RANK` , `LAG`), anti-joins.
- ☒ **Interview Performance:** STAR leadership stories, 60-min universal mock interview rubric, 24-hour rapid revision checklist.

38.3 Code & Governance Reference

```
# Automated Notebook Audit Command
python3 audit_notebook.py --verify-all
```

38.4 Anti-Patterns & Pitfalls

- **Skipping Weak Topics:** Focusing only on UI automation while ignoring JVM memory architecture and SQL window functions.
